Release 1.2.3 on mac OS 10.13 frequently hangs.
Bought TS a long time ago. I hadn't played in quite a while. Didn't have many technical problems before. But now can't get passed turn 2 before it hangs. Tried reinstalling; still no dice.. Single player: if you're a novice like I was the single player will still rock you. After a while you will notice some poor strategic decisions that you can exploit. Still, it's a fun challenge and a good way to learn the cards, card scenarios, and improve your gameplay. I'm confused by folks who say the AI takes too long--the computer AI takes about 10 seconds to decide its turn in my games and you can see a timer that goes around the avatar. It's not immediate but not too troubling for me.

The only frequent bug I notice is that the AI will not realign its full allotment of moves from time to time. In other words if it has a 3 Ops card it may only realign two times and pass on its third attempt. It's not gamebreaking, just a poor AI decision.

A lot of great positive reviews of MP which I will defer to since they all reflect my views.. Would be great if it worked, but it's crippled with bugs and discussion forums are filled with complaints that they've been there for years and haven't been fixed. Looks like abandon-ware.
